

a brief
presentation

The essence of productivity is the specialization, so we develop Three independent business units:

web[on]box
msp[ou]box

WebonBox (www.webonbox.com)

WebonBox is a business unit 100% focused on web development and brandPositioning. This specialization leads to productivity increases which in turn reduce cost and increase quality.

Talenthunting

Talents Hunting (www.7eighth.com)

It allows our clients to increase the size of their effective team by making use of Human Resources hired through us. We are 100% focused on IT Resource Consulting with a large, active and dynamic human resources database. The screening process makes use of psychologists, consultants and specialists in each area to ensure a good fit for the role you desire.

OnSchedule

OnSchedule (www.7eighth.com)

Our "OnSchedule" business unit focuses 100% on large projects. Our team of professional project managers' core responsibility is managing large projects. This team plans, executes and manages large projects on schedule. Our priorities are maintaining both high levels of quality and customer service.

Our Goal: The Highest Quality, Greatest Security at the Lowest Price

"Our customers wrote our value proposition!"

It's simple, tangible and measurable"

Increase your Profit:

- We increase your profit by passing on these aspects of our low overhead costs
- Value Added Tax exemption for (software development, IT services, not sure what it encompasses) - 22% savings
- Income Tax exemptions - 25% savings
- Generally lower overhead - 60% savings
- Lower IT salaries - 40% savings

Improve your operational efficiency:

- Eliminate costly employee overtime
- Focus your scarce resources on mission-critical projects.
- Obtain the benefits of working with a specialized company.

Eliminate all Uncertainty:

- Twenty-four-seven free and fluent personal communications with certified project managers."
- Access to online administration tools to monitor the progress of your projects and productivity of your resources, from an overview to the most detailed level.

How does 7eighth offer the highest levels of Quality?

Uruguay is recognized worldwide for its high literacy rate and world-class educational system. Our highly educated and talented citizens are among our greatest national assets. This allows us to offer a wide network of skilled and certified resources with technical specialties and proven global experience.

The world-class telecommunication and electric power infrastructure present in Uruguay make us the leader in Latin America.

This gives you the competitive advantage of having a business development partner in a lower-cost yet stable environment

7eighth has embraced the "Project Management Professional (PMP)" project management methodology.

The concepts of PMP are the very core of our Quality Assurance systems.

As a result our clients see a continuous and tangible return on investment through high standards of quality, transparency and accountability

Greater Security / Our Value-for-Price Proposition

One of our biggest commitments: **Security and Trust.**

Every client is given a local phone number that allows them to communicate with their project manager instantly and directly.

Clients also have access to on-line administration (project management) tools for monitoring the work of their resources or the status of their projects, from the overview to the most detailed level.

All our Managers are fluent in English enabling unhindered and easy communication with us.

For many businesses the **low price** is an advantage, for us **is a must**

As a matter of fact Uruguay's highly-skilled resources are less expensive than comparable staff in North America, Europe and Southeast Asia

Advances in technology like high-speed internet access allow us to deliver our competitive advantage directly to our clients in other countries. Your direct line to our lower costs will increase your profitability without sacrificing quality.

The official policy of our forward-looking, democratically-elected and stable governmental system is to focus on the future. Information Technology businesses have special tax exemptions and we pass these directly on to you through reduced costs.
